A 110 kilovolt (kV) 'loop-in/loop-out' Air-Insulated Switchgear (AIS) electricity substation, including 2 no. single-storey control buildings (with a total gross floor area of 622 square metres (m²)), transformers, busbars, insulators, circuit breakers, and lightning poles, within a secure compound (with a total footprint of approximately 10,600m²);
- ii. 2 no. lattice-type interface masts, each of which will be 16m in height, and approximately 320m of underground electricity line between the electricity substation and the interface masts to facilitate connection of the electricity substation to the existing Kells-Kilkenny 110kV overhead electricity transmission line;
- iii. A new site entrance from the L66732 and approximately 11km of access track to facilitate access to the electricity substation and interface masts;
- iv. The demolition of an existing agricultural shed (with a total gross floor area of 210m²) to accommodate the access track leading to the electricity substation;
- v. The widening of the carriageway of the L66732 by approximately 1.5m over a distance of approximately 130m;
- vi. An electrical control unit with a total gross floor area of 42m² located at the permitted White Hill Wind Farm (An Bord Pleanála Reference ABP-315365-22);
- vii. A new site entrance from the L7117 and approximately 250m of access track to facilitate access to the electrical control unit;
